

Edu: A hands-on course in ADQL

Hendrik Heint (*heint@ari.uni-heidelberg.de*)

Agenda

- Why teach ADQL ?
- How to teach ADQL
- Easy access to the sources

Talk presented in the EduIG session at the Northern spring Interop in Shanghai, May 2017.

Why teach ADQL ?

- Users don't know about it.
- Many users are unfamiliar with reading documentation.
- ADQL is powerful (the poor man's "code to the data").
- [insert your reason here]

How we teach ADQL

Coverage:

- Who is addressed ?
- What is the teacher's goal ?
- What is the student's / user's goal ?
- How do I get "there" ?

The course

You find the course at <http://docs.g-vo.org/adql/html/>

The branches

- Generic course: <http://docs.g-vo.org/adql/html/>
- Gaia <http://docs.g-vo.org/adql-gaia/html/>
- Cosmology in workprogress

The Sources

TeX sources are available through GAVO's SVN repository. Talk to us for access.
