

DAL conclusion

Victoria (BC Canada) Interop meeting

June, 1st, 2018
F.Bonnarel, M.Molinaro

Session 1 (Tuesday 10:30)

- ADQL 2.1
 - Markus Demleitner focused on what should be checked/fixed before REC (see splinter below for more details)
- SLAP2.0
 - Nicolas Moreau gave revision status
 - DALI compliance and DM update
 - SLAP 2.0 can run as simplified service on TOP of VAMDC-TAP services
- Visibility and Observation Locator protocol
 - Jesus presented 2 new protocols developed to coordinate information to plan for new observations
 - One is a SAP, the other a TAP based solution

Session 1 (Tuesday 10:30)

- ProvTAP and ProvSAP (ex ProvDAL) status
 - François Bonnarel gave ProvTAP status nearly ready for WD publication
 - Future TAP implementation at CDS on HiPS generation
 - ProvSAP (ex ProvDAL) has 2 implementations. WD is ready
- NED TAP implementation
 - Olga Pevunova gave implementation and feedback status
 - Service is operational. To be registered soon.
- TASMAN : TAP Schema manager
 - Marco Molinaro gave some Feedback on TAP 1.1 related to experience with TASMAN

Session 2 (Thursday 9:00)

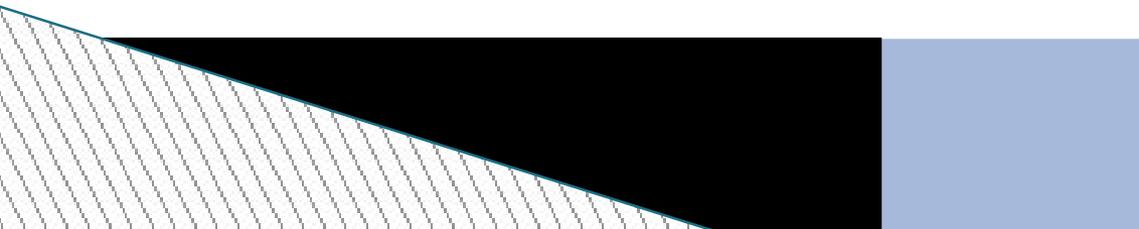

- STC implementation issues and errata
 - Alberto Micol reported on a frequent error of implementation of STC POLYGONS which must be CCW
 - Erratum report on STC area formula (→ DM)
 - DALI-next
 - Pat Dowler explained VOTable datatype system
 - New MOC and other REGION xtypes to go to DALI next ?
 - DataLink, SODA and SIAV2 feedback update
 - François Bonnarel reported on DataLink recognition outside Obscore context (proposed solutions)
 - Core semantics update. Access inside Packaged datasets
 - SIAV2 needs collections listings + virtual datasets + V1-V2 combination
 - Too few SODA feedback to make some recommendations
- 

Session 2 (Thursday 9:00)

- DataLink feedback from TOPCAT experience
 - Mark Taylor reported his experience in implementing DataLink
 - Proposal for nested RESOURCE to bind « results » and « meta » responses (Service Descriptor) +New features in service descriptor
 - New Link index field proposal for better cross response binding
- Datalink feedback from stellar libraries data providing
 - Carlos Rodrigo reported on 3 different techniques used for DataLink URL recognition and exposition
- Report on DAL protocol for the CTA archive under development
 - ObsTAP service + DataLink towards UWS services and Provenance service. Service descriptor including Provenance Params

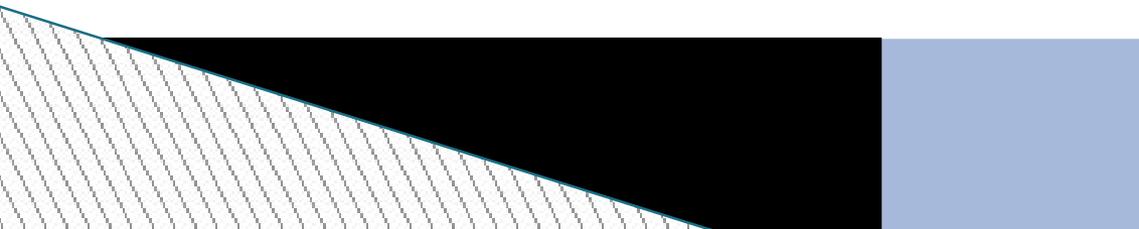

Splinter Session (Thursday 17:30)

- TAP 1.1
 - UWSRegExt to a Note, referenced by TAP while waiting from GWS a definitive solution. TAP can go on with the recommendation process.
- ADQL 2.1
 - STC-S REGION (legacy, non normative) to go in Appendix. BOX dropped. CIRCLE based on POINT & SET operators need BNF. DROP CAST. TIMESTAMP keep but alert users. BOOLEAN operators and remaining points to be discussed on mailing list.
- STC-S : CCW POLYGON
 - DAL chair Mail to mailing list + DAL Implementation note

Splinter Session (Thursday 17:30)

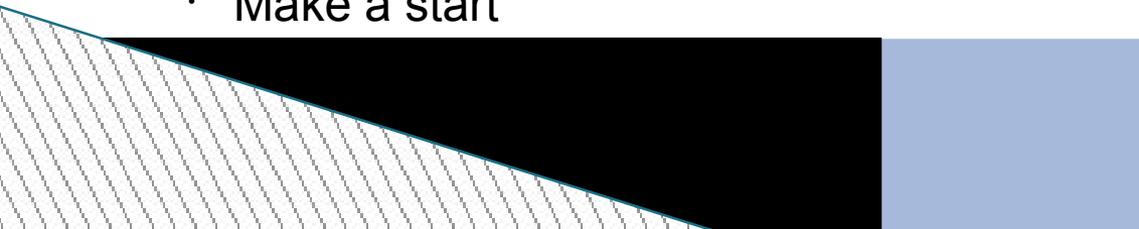

- DataLink
 - Discovery: beside SD and « double field url/format » solutions, introduce LINK to recognize/represent DataLink URL fields. Also useful for direct links to datasets
 - SD syntax to be extended/modified. Restful URL
 - Semantics vocabulary extension page settled.
 - Datalink-next page settled. Please come !
- TimeSeries discovery and access protocol
 - Couple of extensions to ObsTAP, SIAV2 and SODA needed. One single document can tackle all this

Roadmap 2018A

- TAP 1.1
 - Little extension of RFC (new PR). Will finish soon.
- ADQL 2.1 :
 - Some revision and 1 implementation before going to RFC.
- SLAP 2.0
 - Implementation to be published. More comments needed.
- SCS 1.1
 - New draft and back-compatibility check for fall Interop.
- DALI-next
 - Discussion page settled. Please contribute!!!

Roadmap 2018A

- OLAP, OVAP, ProvTAP, ProvSAP
 - 4 new Working drafts published. Read them and comment !!!
 - DataLink :
 - Discussion page. Implementation note. DataLink1.1 spec to be started
 - SIAV2.1
 - Make a start
 - SODA
 - More implementations needed
 - TimeSeries discovery and access protocol
 - Make a start
- 

Thanks !

- Thanks everybody in the WG for excellent work spirit during the last 4 years
- Special acknowledgment to Marco for collaboration in co-chairing the WG !
- Great success to successors !
