

Data Model Working Group

Closing Remarks

Chair: Mark Cresitello-Dittmar
Vice-Chair: Laurent Michel

Jun 01, 2018

IVOA Interop – Victoria

In a word

Jun 01, 2018

IVOA Interop – Victoria

Summary

- **DM-1**
 - Presentation on deriving utype-like expressions from annotated instances to refer to vo-dml elements.
 - Primer demos of VO-DML/mapping related tools for Hack-a-thon
 - Python library (rama) and notebook
 - VO-DML Mapper
 - HSC on MAST portal
 - Illustrate the benefits gained by mapping data

Summary

- Hack-a-thon: very successful!
 - Progress on vo-dml/xml → xsd script
 - Needs more work (important!)
 - Non-trivial startup and maintenance for modeling
 - VO-DML aware UML tool would be AWESOME!
 - Emphasized importance of data providers and client developers to actively collaborate with modeling efforts to identify holes and compatibility with real world data.

Summary

- Hack-a-thon:
 - Will follow-up to gather participant feedback
 - Specific interest in identifying new model requirements
 - Watch for announcement
 - Hack-a-thon wiki page now has a section to add feedback comments
 - <http://wiki.ivoa.net/twiki/bin/view/IVOA/InterOpMay2018VODML>
 - Email working groups

Summary

- DM-2
 - STC-2.0
 - Very mature; well exercised (cube, time series)
 - Satisfies cube requirements
 - PRIORITY: document current working versions and get into REC process
 - Hack-a-thon identified 'missing' elements for general usage
 - More exercising required by other data providers and clients

Summary

- **DM-2**
 - Provenance
 - New draft delivered
 - Focus on model (extract DAL sections)
 - Lively discussion on parameter as Entity
 - Goal to be in RFC process before next interop
- **IVOA model in CAOM**
 - Proposal to add types to ivoa base types model, with serialization spec. in DALI
 - uuid
 - Point, Rectangle, etc.

Summary

- Discussion
 - Kai presented group with interesting problem regarding storing and annotating algorithms used to characterize large datasets.

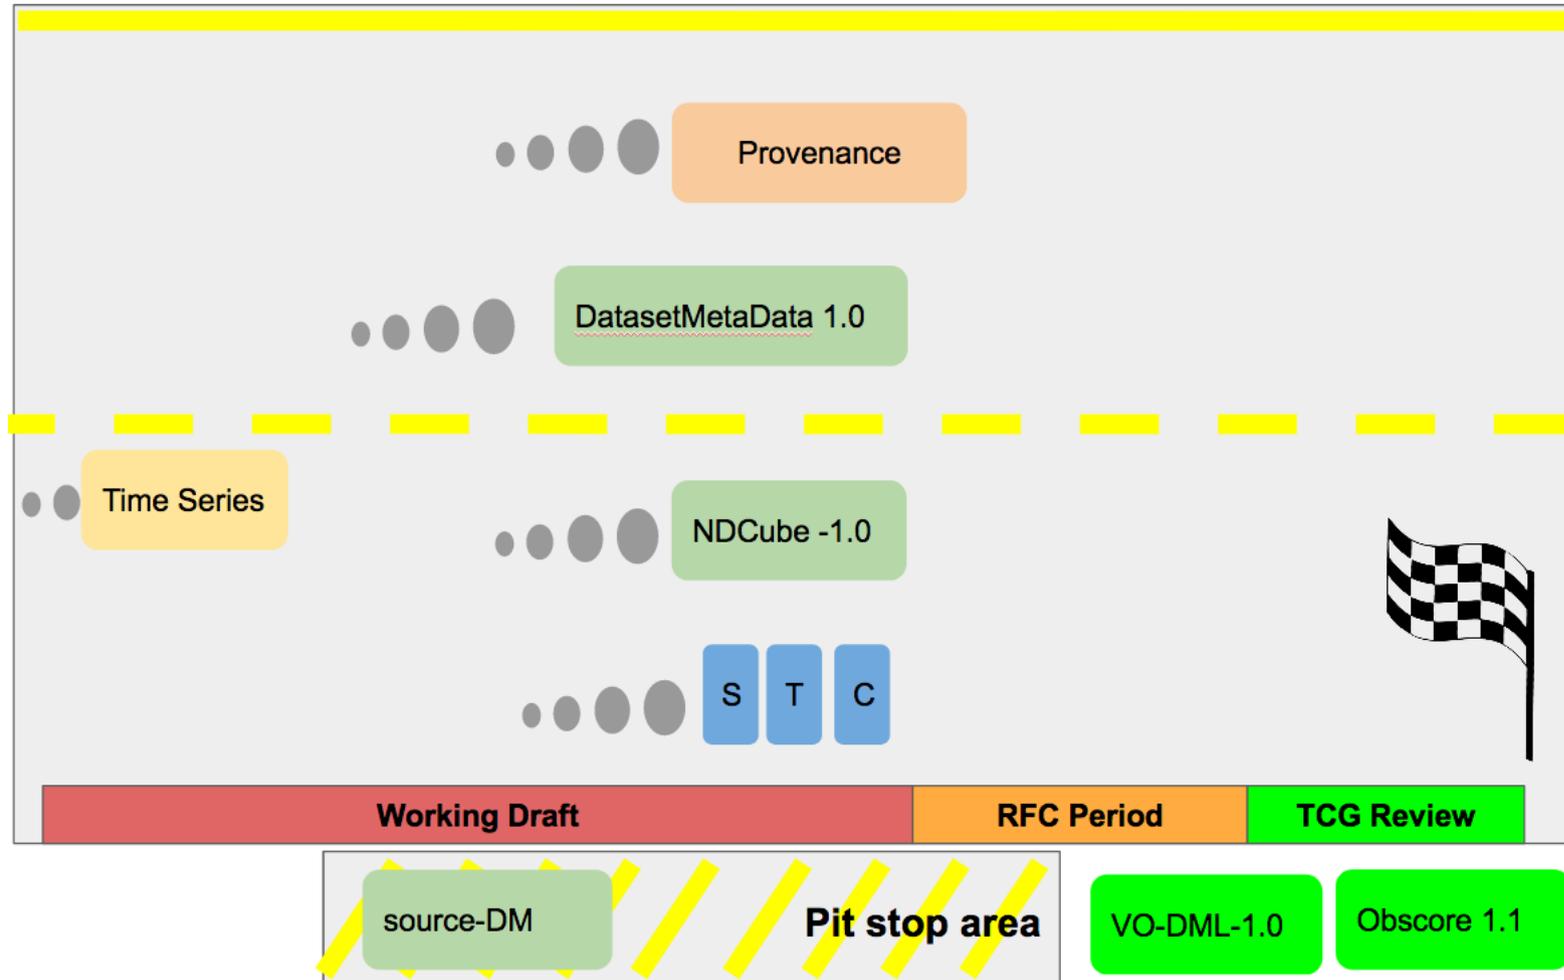

Collaborations

- Apps
 - Implementing/testing models and syntax
- TDIG
 - Exercising models in new cases
 - Setting groundwork for proper model
 - URGENT: to have prototype model ASAP
- SSIG
 - Increase communication
 - Coords reference frame from enum → vocab.
 - Other?

Roadmap - Victoria
