Ref. Implementation 1	SAMP implementations are listed at http://www.ivoa.net/cgi-bin/twiki/bin/view/IVOA/SampSoftware
Ref. Implementation 2	Various applications already talk SAMP, in particular TOPCAT, Aladin, Stilts, WWT (list not exhaustive)
Ref. Implementation 3	JSAMP and SAMPy, which are libraries implementing every feature of the standard. JSAMP also contains a comprehensive validation tool.

Recommendations to EXEC	Main comments during RFC period led to an update of the SAMP document and to the creation of the www.ivoa.net/samp page where the SAMP vocabulary will be described and maintained. Unanimous approval from all TCG members. Various implementations already in place. The TCG wants to thank the authors for their excellent work and recommends the IVOA Exec to approve SAMP as an IVOA standard.
