Ref. Implementation 1	All existing SSAP 1.04 and SpectrumDM 1.03 implementations should remain valid with SSAP 1.1 and SpectrumDM 1.1
Ref. Implementation 2	

Recommendations to EXEC	SSAP 1.1 and SpectrumDM 1.1 represent minor updates from previous Recommended versions, to reflect comments received to ensure full consistency between both standards, to make updates from implementations feedback, and insert the reference to the IVOA Architecture. The documents have been reviewed through RFC and TCG review with full approval, so we recommend the EXEC to approve SSAP 1.1 and SpectrumDM 1.1 as IVOA Recommendations
