IVOA Support Interfaces (VOSI) 1.0

RFC page	VOSI
Start RFC	09-Apr-10
End RFC	14-May-10
Start TCG Review	08-Dec-10
End TCG Review	06-May-11
Start Exec Review	13-May-11
REC date	31-May-11

	YES	Yes, but	NO	Comments to be brought to the Exec
WGs				
Apps	1			Comments to be taken into account prior to sending the doc to the EXEC
DAL	1			
DM	1			
GWS	1			
Registry	1			Comments to be taken into account prior to sending the doc to the EXEC
Semantics	1			A few typos to be corrected
VOEvent	1			
TCG	1			Decisions taken at Nara Interop to be reflected in the document
IGs				
Data CP				Approval not formally required
KDD				Approval not formally required
Standards and Processes				Approval not formally required
Theory	1			

	YES	Yes, but	NO
TOTAL	9	0	0

Ref. Implementation 1	CADC has 3 TAP services which implement VOSI: http://www.cadc.hia.nrc.gc.ca/caom/availability http://www.cadc.hia.nrc.gc.ca/caom/capabilities http://www.cadc.hia.nrc.gc.ca/caom/tables
Ref. Implementation 2	

Recommendations to EXEC	VOSI has gone through RFC and TCG Review periods and it has received approval from all TCG members. VOSI specifications mandates that all VO services provide the availability and capabilities interfaces described in this document. Nonetheless, it is agreed that IVOA "services" standards previous to VOSI may not be forced to retrospectively implement VOSI (although that should be encouraged). There exists various reference implementations as part of TAP implementations. So we recommend the IVOA Exec to approve VODataService as an IVOA Recommendation.
