	YES	Yes, but	NO	Comments to be brought to the Exec
WGs				
Apps		1		I remain unconvinced that that there is good motivation for the spurious TR/ID and TD/encoding attributes; in the first place I haven't seen persuasive evidence that these attributes do actually fix any code generation issues (I think it's also possible that they will introduce new ones), and in the second place while I agree that in case of conflict the document text should override the schema, I don't feel that this is a good reason to allow uncontrolled introduction of misleading clutter to the schema. However, with this reservation, the Apps WG approves the document.

	YES	Yes, but	NO	
TOTAL	13	1	0	

Ref. Implementation 1 TOPCAT has already been adapted to VOTable 1.2

Ref. Implementation 2

Recommendations to EXEC	VOTable 1.2 has been discussed for a long time and we have now come to an (almost) unanimous agreement so we recommend it to be endorsed by the IVOA Exec. That would probably be the last version of VOTable and we recommend that the VOTable WG goes into a non-active status until further need (if any).
