# Protocols due for DataCube Access IVOA priority – 1

- DataLink = attaching ressources and services to query reponse results and datasets
  - 1st PR version end of may
  - RFC period started in July. Good discussion
  - 2$^{nd}$ PR version beginning of September.
  - TCG review started October 1st

# Protocols due for DataCube Access IVOA priority – 2

- SIAV2 = Parameter driven service for data discovery and description, ObsCore 1.1 metadata
  - 1st PR version in July (with additional query parameters)
  - RFC period started end of July
  - Some (minor?) issues discussed
  - Imminent New PR version

# Protocols due for DataCube Access IVOA priority – 3

- **AccessData** = distant extraction / transformation of datasets
  - March draft based on syntax similar to SIAV2
    - Discovery/access workflow
    - Possible Multiparam query
  - Issues developped on the list:
    - Poor parameter description
    - Multi service query difficult
    - Proposal of 3 attributes atomic parameter description
  - Side meeting last Monday in Calgary:
    - Keep the SIAV2 syntax,  but add , ucd, unit, format  (=xtype)  description  in  the descriptor.

# TAP and ADQL

- After Madrid roundtable on draft TAP implementation note
  - Short term project of strong/erratum note on TAP and ADQL
  - Mid term project : TAP 1.1 and ADQL 2.1
  - Round table in DAL2 on Saturday morning
    - Possibility of follow up Saturday afternoon
