

P3T Forward Planning mtg - May 22 @1:30

Roadmap - Phase 1

- Initial proof of concept for tools and processes;
- Focus on:
 - Old
 - TAP 1.2 (CADC/MAST) - Java/Python
 - UWS (Rubin/MAST) - Java/Python
 - New
 - Execution Broker (SKA/SRC)
- Produce WDs for TAP & UWS with OPEN_API split [[Pat, Paul]]
 - Empty templates (New - in GitHub repo)
 - Fill in as prototype develops (OPEN_API)
- Produce an IVOA Note - Latex
 - Put in P3T Github repo [[MM setup]]
 - work first on outline & motivations
- Mark Taylor's email & others in P3T (Mark, Pierre, Markus, Paul)
 - Russ has done a nice job responding/explaining/gathering insight from clients
- Use P3T Github repro that James organized for prototypes
 - OpenAPI test for TAP
 - OpenAPI test for UWS
- P3T meet 3rd week of June
- invite folks from services in a mtg in a few months in open forum
 - Contact significant services and discuss change
 - Aladin
 - Topcat

- Firefly
- ESASky???
- ???
- Include in discussion:
 - security
 - case sensitivity
 - form encoding
 - serialization
