

# Concluding remarks

- Hard work and excellent progress
- Agreement on the essential IVOA standards
- Impressive number of standards to go to RFC/PR now or very soon
- Hope that the momentum will not be lost

- Opens the next phase: evolution of standards, feedback from implementation and usage, maintenance (cf VOTable)
- More role for data centres
- Probably subset of standards in response to sub-community needs (cf VOEvent, VO & Spectroscopy Workshop)

# WG Chairs (1)

- We gave them an impossible task: create a complete framework of interoperability standards with a bottom-up approach, in an international project based on best effort, which mean that they did not have control on the participants available time (nor on their own in many cases)
- A huge work which for many of them came in addition to their main tasks
- They had to invent a model

## WG chairs (2)

- IVOA owe all the initial WG chairs and their successors already in charge a deep gratitude: they have taken us to the completion of the initial framework building phase
- J. McDowell, G. Rixon, D. Tody
- T. Linde, M. Nieto Santisteban, M. Ohishi, R. Williams
- R. Moore, N. Walton
- and all the current chairs and vice-chairs

# Appointments

- TCG Vice-Chair            Christophe Arviset
- DAL            Keith Noddle, Markus Dolensky
- DM            Mireille Louys, Anita Richards
- G&WS        Matthew Graham
- DataCP       Robert Hanisch
- Astro-RG TBD
- Interop: Marie-Lise Dubernet, Severin Gaudet
- Next IVOA Vice-chair: process on-going

# THANKS

Our deep gratitude goes to our hosts the NAOC and Y. Zhao for their gorgeous hospitality

**Merci, gracias, grazie,  
thanks, dankjewel, danke schön,
