THE INTERNATIONAL VIRTUAL OBSERVATORY ALLIANCE

Resource Registries Working Group

Registries are reaching a watershed

- Upgrading to Registry Interface v1.0
 - Trigger a chain of standards going to PR
- New protocols will define their own service-specific metadata
- Expanding suite of validation services available
 - Latest: Registry of Registries will validate all resource records
 - Can we pull these together as part of a coordinated curation effort?
- Emergence of Advanced Discovery Techniques
- Retrieving resource metadata from Services
 - VO Standard Interface (VOSI): getRegistration(), getMetadata()
 - DAL's getCapabilities()
- Fine/Rich vs. Coarse/Slim Registries
 - Table metadata
 - Can we apply quick solution or comprehensive solution later

This week

- Switched Tuesday's & Thursday's schedule
- Monday 14:00 15:30
 - Registry Upgrade Status & Standards Issues
 - Review of Roadmap
 - Status reports, problems encountered with standard
 - Graininess I an Introduction
- DAL1 Monday 15:30 17:00
 - How-to define Service Capability Metadata
- Tuesday 10:30 12:00
 - Advanced Discovery Techniques
 - How-to define Service Capability Metadata
- Thursday 14:00 15:30
 - New Extension Schemas:
 - VOApps & VOStandards
 - Astronomical Outreach Imagery Metadata (AOIM)
 - Graininess II positions and proposals

This week

- Switched Tuesday's & Thursday's schedule
- Monday 14:00 15:30
 - Registry Upgrade Status & Standards Issues
 - Review of Roadmap
 - Status reports, problems encountered with standard
 - Graininess I an Introduction*
- DAL1 Monday 15:30 17:00
 - How-to define Service Capability Metadata*
- Tuesday 10:30 12:00
 - Advanced Discovery Techniques
 - How-to define Service Capability Metadata*
- Thursday 14:00 15:30
 - New Extension Schemas:
 - VOApps* & VOStandards
 - Astronomical Outreach Imagery Metadata (AOIM)
 - Graininess II positions and proposals *

*Issue that cuts across Working Groups!

*Issue that cuts across Working Groups!

*Looking for interested people to assist with standardization

RI Upgrade & Standards Roadmap

- Registry Interfaces (RI) v1.0, Working Draft
 - Year delay in full deployment
- Current Roadmap:
 - April 6: Registry of Registries (RofR) ready to validate registries
 - April 30: Registry Upgrades Largely Complete
 - May 1: Testing period begins
 - May 14: IVOA Interop: discussion of remaining problems
 - May 30: global power-on of new registries
 - June 15: stability
 - July 1: begin RI-related PR process
- Get status of upgrade from projects
 - Any issues meeting standards? Any changes required?
- Revise Roadmap
 - Emphasis on PR/Rec standardization schedule

Cross-cutting Topics

- Making new standard protocols registry-ready
 - How to define new capability metadata
 - DAL-1 (Monday, 15:30), Reg-2 (Tues. 11:45)
- Getting resource metadata from services
 - getCapabilities() at DAL-1 (Monday, 15:30)
 - VOSI at GWS-3 (Friday, 8:30)
 - Reg-3: in context of "Graininess" issue
- Graininess
 - Reg-1:
 - Principles for allowing added value/innovation while preserving & encouraging interoperability
 - Try to gain a common understanding of what "fine-grained" means
 - Reg-3:
 - Consider proposals for controlling accumulation of fine-grained information.
