## Registry Roadmap Status: Changes

---

### Errata:

- VOResource 1.1 Re-enable multiple security methods per interface
  - Accepted at TCG: Contingent on A&A session
- RegTAP 1.0 Case insensitivity in an example query against res\_details
  - Accepted at TCG

### RegTAP 1.1:

- Ready for RFC: Contingent on A&A session

### Discovering Data Collections Note:

- TCG / Done?

## Registry Roadmap Status: Ongoing Work

---

### VODataService 1.2

#### Errata: VOResource 1.1 # in identifiers

- content-complete regexp
- needs doc process OR different solution

#### Operations & RofR Validation:

- validator itself has been reviewed
- # errata or other solution still required
- RofR re-ingested member registry records
- OAI and Resource validation progress
  - Euro-VO validates entirely!
  - STScI is getting there: software fixed, records curation ongoing

## Registry Roadmap Status: New/Reopened Work
