

TDIG RoadMap from northern to southern Spring 2021

- **On coverages**
 - MOC2.0 WD, 2 implementations and validator → RFC (TD & Apps)
 - Info collected under: <https://wiki.ivoa.net/twiki/bin/view/IVOA/MocInfo?>
 - Everyone is welcome to comment under <https://github.com/ivoa-std/MOC>
 - Use of Time-Frequency Catalogs for by solar & planetary radio sciences → evaluate further on extension of MOC to add frequency / energy / wavelength (TDIG & SS & Radio IGs)
- **Services on Alerts and follow-up observations**
 - FRBCat and TNS → follow-up on possibility of adding a TAP service (TD & Radio IGs)
 - Data Central's Data Aggregation Service to quickly inspect FRB candidates → Follow-up of time series explorer (TD + DAL)
 - Astro-COLIBRI → follow-up on usage of IVOA stds where possible, e.g ObsLocTAP, ObjVisSAP
 - ObsLocTAP → REC
- **TimeSeries discovery and Access** → Update the note to include the SSA keeping in mind the std is likely to evolve in the near future (TDIG & DAL)
- New chairperson → transition
