

SSIG Closing Remarks

Interop Nov 2018

B. Cecconi (chair)

SSIG Splinter Session

- VESPA Status Update

- *PSA complete archive (ESA)*
- *HST planetary data (LESIA, to CADC archive)*

- Radioastronomy observation modeling: using VO tools for computing and distributing simulation runs.

EXPRES simulation runs:

- **TAP (VESPA EPN-TAP)**
- **Das2/Autoplot**
- **UWS (for online computation)**

- Bridging VESPA and PDS4
- Preliminary discussion about Space Reference Frames

Other discussions

- **TDIG**
 - HAPI presentation
- **Registry**
 - VOEvent: registering VOEvent streams
- **DAL**
 - DALI details for non-SODA computing services
- **Semantics**
 - Vocabularies for Observation Facilities and SpaceRefFrames

Roadmap for next 6 months

- First draft of Nomenclature of Observation facilities
- First draft of StdRefFrames list (collab. with NASA/PDS)
- First draft of EPNcore DM

- **Ongoing:** Support to teams willing to test/implement EPN-TAP on SSIG related data collections
