

The IVOA Radio Interest Group

(Chair: M. Lacy,
Vice-Chair F.
Bonnarel)

- ▢ Provides a platform for discussion of how best to integrate radio data into the VO and a well defined point of contact for radio data archive projects with the IVOA.
- ▢ Formed in Spring 2020, with a session at the May 2020 interop, two telecons since then, and a related BoF session on radio archives at ADASS 2020 (led by K. Lutz).
- ▢ We are currently preparing an IVOA implementation note on the current state of radio data in the VO.
- ▢ Recent highlight - the Apertif survey data release 1 (last week) uses VO services (vo.astron.nl).
