

TDIG Opening

Chairs: Ada Nebot & Dave Morris

- Goals:
 - Provide a forum for discussing time domain specific issues in a VO context.
 - Contribute to other IVOA working groups to ensure that time domain specific requirements are included.
 - Incorporate standard approaches defined in these groups when designing and implementing services on time domain archives.
 - Define standard services relevant for time domain archives.
 - Promote development of services for comparing theoretical results to observations and vice versa.
 - Define relevant milestones and assign specific tasks to interested parties.
- How to participate?
 - Register to email list : voevent@ivoa.net
 - Participate to the interop meetings

TDIG Opening

- Time Domain related topics discussed during this interop
 - For planning of (follow-up) observations:
 - **ObsVisSAP:**
 - Visibility of object to plan observations
 - Status report — DAL session on Tuesday @ 13:30 UTC
 - **ObsLocTAP** status :
 - To facilitate coordination of observations
 - Status report — DM session on Tuesday 17th Nov. @ 15:00 UTC
 - Search data based on time
 - **MOC status:**
 - For spatial and temporal coverages
 - Status report — Apps session on Tuesday @ 22:00 UTC
 - **ConeSearch:**
 - Extended for time search
 - Status report — DAL session on Wednesday @ 22:00 UTC (quick report if time allows it)
