

# *VOTable Concluding Remarks*

*Agenda of this **last** VOTable meeting was:*

- The VOTable-STC connection:
  - Version 1.01 published on the IVOA pages
- The last step to VOTable1.2
  - should move to the Recommendation procedure
- Future of VOTable WG

# Conclusions

- 1) IVOA note on VOTable-STC connection:  
slight changes --> V1.02 to be published  
*(notice about utype: prefix **stc:** required, even though the STC schema is specified by xmlns)*
  - 2) VOTable-1.2: agreement to move to  
Recommendation procedure; slightly  
modified version will be submitted for RFC
- 
-

## *Conclusions (cont'ed)*

- 3) VOTable schema slightly updated => is there an *official* URI defined for IVOA schemas ? And rule(s) for their versioning ?
- 4) VOTable WG future: once VOTable-1.2 is a recommendation (couple of months), status of WG to be decided (*not by me!*)
