

DAL Opening notes

F.Bonnarel (CDS/CNRS)
M.Molinaro (INAF - OATs)

TAP, DALI, TapRegExt, ADQL (session 2 – Saturday)

- DALI discussion in the working group can be considered over. Move to PR
- TAP 1.1 : datatype+xtype in TAP_SCHEMA. Will be moved to PR after interop
- TAPRegExt is adapted to TAP 1.1 will move to PR just after
- ADQL 2.1 : new functionalities (with respect to ADQL 2.0) are now clear, but the BNF is not currently reliable.
- Proposal : fixed BNF before going to PR. (or separate BNF in an independent document. TBD in DAL2?)

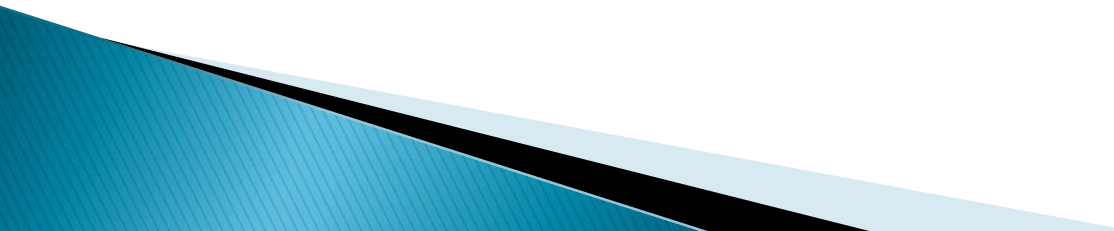

SODA 1.0

- ▶ SODA is now in RFC.
 - ▶ First implementations are currently tested
 - ▶ Need some more feedback on the RFC page
- 

Implementations, software (session 2 saturday)

- ▶ Chaitra, Fernique, Boch, Bonnarel
 - SIA, SODA, DataLink implementations in Aladin
 - TAP in Aladin (today in Apps)
- ▶ Olga Pevunova: DAL protocols at NED
- ▶ TOPCAT/STILTS TAP Client
Enhancements (Mark Taylor)
- ▶ OpenCADC DAL code: Pat (today)

Concerns

- ▶ VTP end of RFC since a while
 - ▶ SimDAL also missing agreements
 - ▶ Urgently needed for the two communities
 - ▶ If you have something to say speak now.
- 

Other topics discussed this week

- ▶ VOTABLE/JSON conversion (today). Apps and DAL may be impacted
- ▶ SLAP/XSAMPS (VAMDC consortium) convergence. (sunday)
 - Spectral lines in the VO
 - DAL future open discussion:
 - Time domain
 - MULTI-D DAL backbone extended facilities in the petascale era.
 - Progressive access (à la HiPS)
 - TAP future
 - Language(s)
