

Registry WG Closing

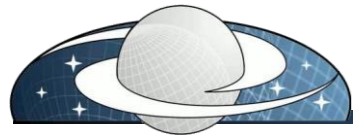

Theresa Dower

NAVO/STSci

Documents Status

- RegistryInterfaces 1.1 to REC (?)
- VOResource 1.1
 - Changes from Santiago for registering secured services
 - interface:securityMethod will be 1:1 instead of 1:n,
 - Arbitrary non-namespace elements will be allowed in securityMethod.
- RegTAP 1.1: to PR after VOResource.
 - to reflect changes in VOResource 1.1

Aladin 10

- Aladin 10 using the registry in several new ways
- Biggest:
 - discovery of data services,
 - Handling TAP tables in large services
- Read Pierre's slides!
- Service providers: Check out Aladin 10 and find your services, see what can be added for better search support.

Purx

- The Proxy Registry: simple way to publish resources
- Host any XML file resource at an (http) URL
- Purx will handle authority/curation overhead and check daily.

Registry of Registries

- Janet Evans for Yulie Zografou:
 - RofR updates and bugfixes
 - Updated several standards including VOResource 1.1 (in RFC).
 - Will harvest publishing registries' Identity records
- Pierre le Sidaner:
 - Toward a mirror of the RofR
 - Usability issues with validator and registries on non-standard ports. Working with SAO folks to resolve.
