- Schedule the next meeting (proposed date 21.02.2023 @14UTC)
- New minutes section (to be added soon) to the twiki
- AOB

Attendees: JE, ES, MM, MA, ML, VD, CA, RD, FC, AN

Minutes:

- Organisation of plenary sessions for interop 2023 A:
 - Follow-up on VO in the cloud / platforms.
 - Security on science platforms (auth&auth): During her visit to CfA Frossie Economou showed advances on the LSST/Rubin platform. It would be interesting to see this at the interop. Identify status on GWS WG.
 - Xml / javascript - AR proposed a speaker around Xml / javascript at a TCG meeting. We should make contact.
 - HipsCat for catalogs: During the AAS there were some discussions around HiPSCat and parquet files.
 - Sharing code: How do we share notebooks, what is the metadata? How do you discover them? How does this relate to the ongoing efforts of GWS and the Registry WGs ?
 - Execution Planner Note: <https://wiki.ivoa.net/internal/IVOA/ExecutionPlanner20211104/IVOA-EP-note.pdf>
 - Registering the notebooks (See Registry RoadMap)
 - Extend usage of Datalink to expose cloud data access buckets in addition to URLs that are returned from e.g. SIA,... LSST, SKA have shown interest. Identification of metadata.
 - Multi-messenger / High energy plenary session. In this context, we are seeing extensions of Obscure to radio data, time-series, high-energy → keep the discussions on the DM WG. No plenary session around the topic. But take example of Radio (Note?) to keep the movement going.
 - Datalink session to inform and encourage its usage. Encourage a DAL session on the topic. An Introductory talk and one hour discussion.
 - DOI, data citation practices, ADS and journals, RD will coordinate with DCP. This will be a Plenary session.
- Flatiron meeting CSP attendance - deadline tomorrow. Several members of the CSP will be attending the meeting. JE, ML have asked for online and VD for in person participation.
- Schedule the next meeting (proposed date 21.02.2023 @14UTC).
- New minutes section added to the twiki
- Next interop is a face to face meeting. MM and JE have drafted a schedule. We need to identify the plenary sessions within a week. DOI session as plenary. VO in the Cloud 1 or 2 sessions? We need to come up with a plan.
