2 Status of Standards in REC process

From the IVOA Document Standards:

Members of the Technical Coordination Group (TCG), composed of the chairs and vice chairs of other Working Groups and Interest Groups, must examine Proposed Recommendations during the RFC period and post comments in the public record. Comments from TCG members may be no more than “read and approved,” or “no dependency” but if TCG members have significant concerns it is during the RFC period that these must be documented.

TCG members are required to note their approval of and/or comments about the document on the RFC public comment website.
