Ref. Implementation 1	
Ref. Implementation 2	The specification describes common patterns and requirements for DAL services; it does not describe a single service that can be implemented. Still, existing TAP services implement most of the recommended practices with only small technical differences that can be addressed in a future version. Other DAL services like SIA and SSA are also more or less consistent with the recommended practices.
Ref. Implementation 3	
Implementation Validator	

Recommendations to EXEC	DALI 1.0 has gone through the REC, and has received unanimous approval from the TCG members. The specification describes common patterns and requirements for DAL services; it does not describe a single service that can be implemented. The TCG recommends the IVOA Exec to approve DALI 1.0 as an IVOA Recommendation.
