GWS	1			
Registry	1			
Semantics	1			Good to see the de facto standard properly defined. UCD usage will probably be an issue in future SIAP versions !
VOEvent	1			
VOQL	1			
VOTable	1			Looks compliant with VOTable-1.2 definitions (example of section 6.1 was checked against latest schema 2009-09-29)

SIAP1

Ref. Implementation 1

Many reference implementations have been around for years and have been registered in the Registries, and used by various applications

Ref. Implementation 2

Recommendations to EXEC	Although it had been in used for many years, SIAP 1.0 had never formally gone through the full REC process. It was decided to update the old existing WD to what has been implemented by most of the services while keeping most of the SIAP services compliant. SIAP 1.0 is now then ready to be endorsed by the IVOA Exec.
