Ref. Implementation 1	Various SimDM implementations have been documented in a dedicated IVOA Note, updated after some comments, dated 02/April/2012 http://www.ivoa.net/Documents/Notes/ImplementationSimDM/
Ref. Implementation 2	StarFormat – MHD simulations PDR Database – Micro-physics simulations Millenium run: simulation, post-processing and publication

Recommendations to EXEC	<p>SimDM 1.0 has gone through the REC process, generating a fair number of comments, due to the long history of this standard and its evolution through time, including relationship with other IVOA standards.</p> <p>Authors have taken a great care and effort in updating the document, following the comments raised through the REC process. This makes the SimDM standard clearer and more focused on the DM and leaves its integration with other IVOA standards (in particular DAL and Registry) to the next stage (as it should be).</p> <p>Various implementations are available and documented in an IVOA Note. It has received approval from all the TCG members, with some reservations from Apps wrt some wording on non normative part of the document.</p> <p>The TCG recommends the IVOA Exec to approve SimDM 1.0 as an IVOA Recommendation.</p>
