

VOEvent

- **VOEvent 2.0:**
 - Include tabular data – lists, ephemerides, probability maps, ... – using <Table>
 - References with semantic links (type = “dereferencable URI”)
 - simpleTimeSeries (Brewer and Bloom, UC Berkeley)
- Concerned expressed about bespoke time series representation that does not mesh with IVOA time series work
 - Issue for TCG?

Grid and Web Services

- **VOSpace 2.0:**
 - Transfer/search representation to initiate transfer/search job
 - Allow '~' as well as '!' as delimiters in vos:// URIs
 - Core properties for access control:
 - Owner read/write, group read, group write, public read
 - Quota, available space properties
 - Review which parts are mandatory? Revise conformance matrix to show what goes with what
 - Code at OpenCADC
 - New version of Working Draft by Jan 31 2011
 - Proposed Recommendation by Feb 28 2011
- **SSO/CDP:**
 - List of IVOA certificate authorities
- **REST Basic Profile**
 - Working Draft by Dec 20 2010

Grid and Web Services

- **UWS:**

- Java library at CDS
- New phases: Run, Progression
- Multiple job lists
- Multiple users (isolate them)
- JSON format

- **VOSI:**

- Mandates **all** VO services provide capabilities and availability interfaces
- TCG Review: 08 Dec 2010 – 07 Jan 2011

- **GMS:**

- Mailing list discussion about common interface
