

Outcome of the 2 sessions

André Schaaff, Andreas Wicenec

Grid and Web Services Working Group
28 September 2013

IVOA Hawaii, 26-28 September 2013

Session 1

- Data sharing using SciDrive (former VOBox), *Dmitry Y Mishin*
- UWS in action: The CANFAR VM lifecycle web service, *Brian Major*
 - *Minor needs concerning UWS => proposed for the 1.1 release*
- Experimenting clouds with HEALPix surveys, *André Schaaff*
- Results of the public RFC for PDL: answers / modifications, *Carlo Maria Zwölf + discussion*
 - *The document will be modified with a better explanation of what it is and a few simple use cases*

Session 2

- Talk / demo of a cloud use, Andreas Wicenec
- Discussion about workflows
 - No standardization effort, dedicated IG not appropriate, still a part of GWS presentations, dedicated session if needed
- Discussion about “Abusive users” (see next slide)
 - <http://wiki.ivoa.net/twiki/bin/view/IVOA/AbusiveUsers>
- Discussion “And now ?” about existing GWS standards, needs / updates ? (see next slide)

Roadmap

- Now
 - Push PDL to a recommendation
- For the next Interop in Madrid
 - Prepare a UWS 1.1 version (with the needs which require minors changes)
 - Prepare a VOspace 2.1 version (at least one need from CADC concerning parameters)
 - Note about “Abusive users” : as a set of experiences more than a Best practice
- For the coming years
 - UWS 2.0 and VOspace 3.0 : in a first step we will evaluate all the needs out of the scope of 1.1 and 2.1 versions
