

Some sketchy notes from the IVOA website discussion, May 19 2010
Participants: Andy & Christophe & Sarah

--

Documents section of website we will leave as is for now, we can reformat later.

Twiki version is old, perhaps I can update twiki version on my copy and see how it goes during the transition period.

Specific changes/updates to pages as discussed during the meeting:

- Remove document links on "what-is-ivoa"
- Link only the latest technical roadmap on "ivoa-roadmap"
- Contacts - add column with name of mailing list; link should go to archives with a link to how to subscribe at the top of the page.
- Sarah to make sure we have all pages on ivoa wiki either copied over or linked from the new structure.
- Members -> all list of documents & standards
- Deployers -> only most CURRENT approved standards.
- Deployers TOC update:
 - Intro to VO Concepts -†(Andy?)
 - Current list of Standards (display graphically as well with arch diagram)
 - Software for Deployers (euro-vo page)
 - Data Publishing: Worked Example
 - Application Writing: Worked Example
 - Acronyms in Use (Sarah - start with NVO book glossary)

Christophe will take responsibility for content of the "Deployers" section of the website.

- Andy will take responsibility for "Astronomers" section
 - VO Tools & Portals (list - Sarah - euro-vo page)
 - add link to "students & amateurs" ? Who will write this?
