

Remote learning in Beijing during the COVID-19

Alice Cui

CONTENTS

01 **The outbreak**

02 **Back to school**

03 **Home again**

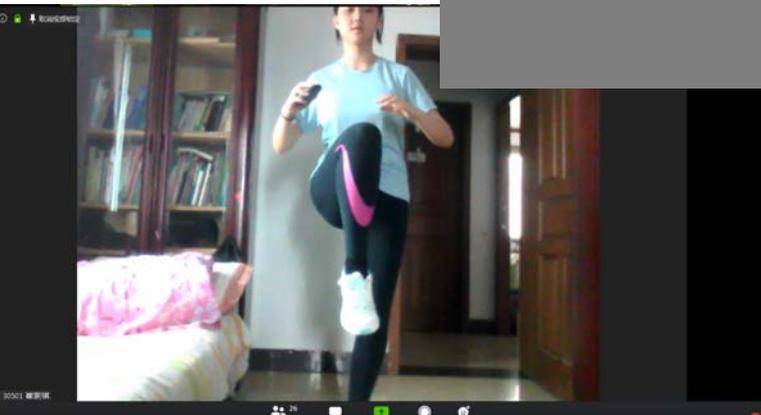

The outbreak

It disorganized all our plans
and spread concern

What we were facing was
the first formal selective
exams

The schools responded
immediately

Online lessons, printer,
body-temperature
reporting.....

Realization of remote schooling

Meetings for Zoom

Back to school

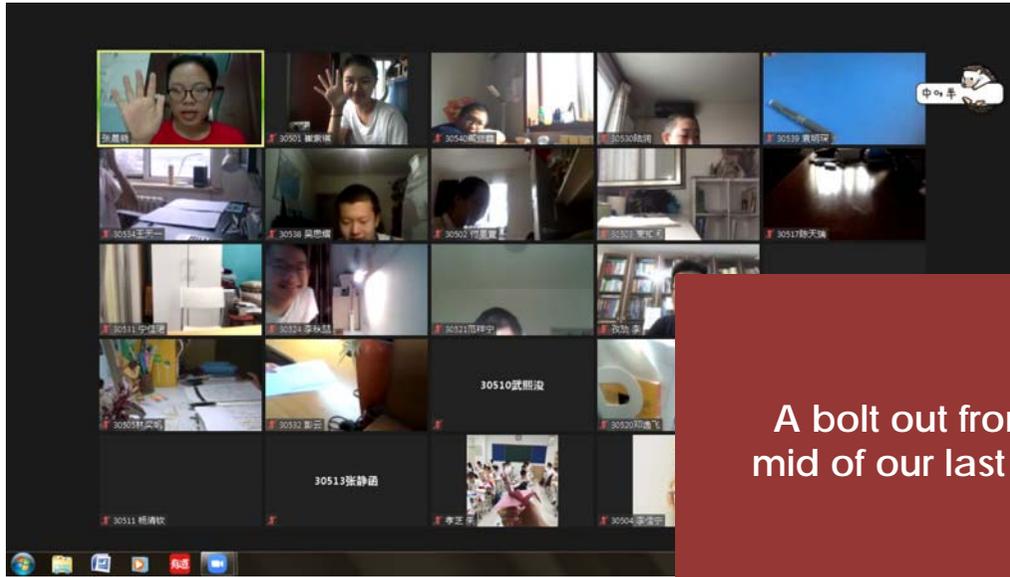

So delighted and
contented to reunite

Strict epidemic prevention
methods---split classes,
one-meter lines, wristbands

Took quite some time to get
used to things

All sports banned

Home again

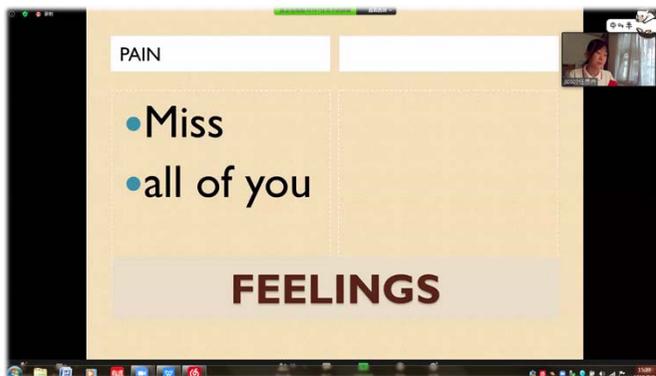

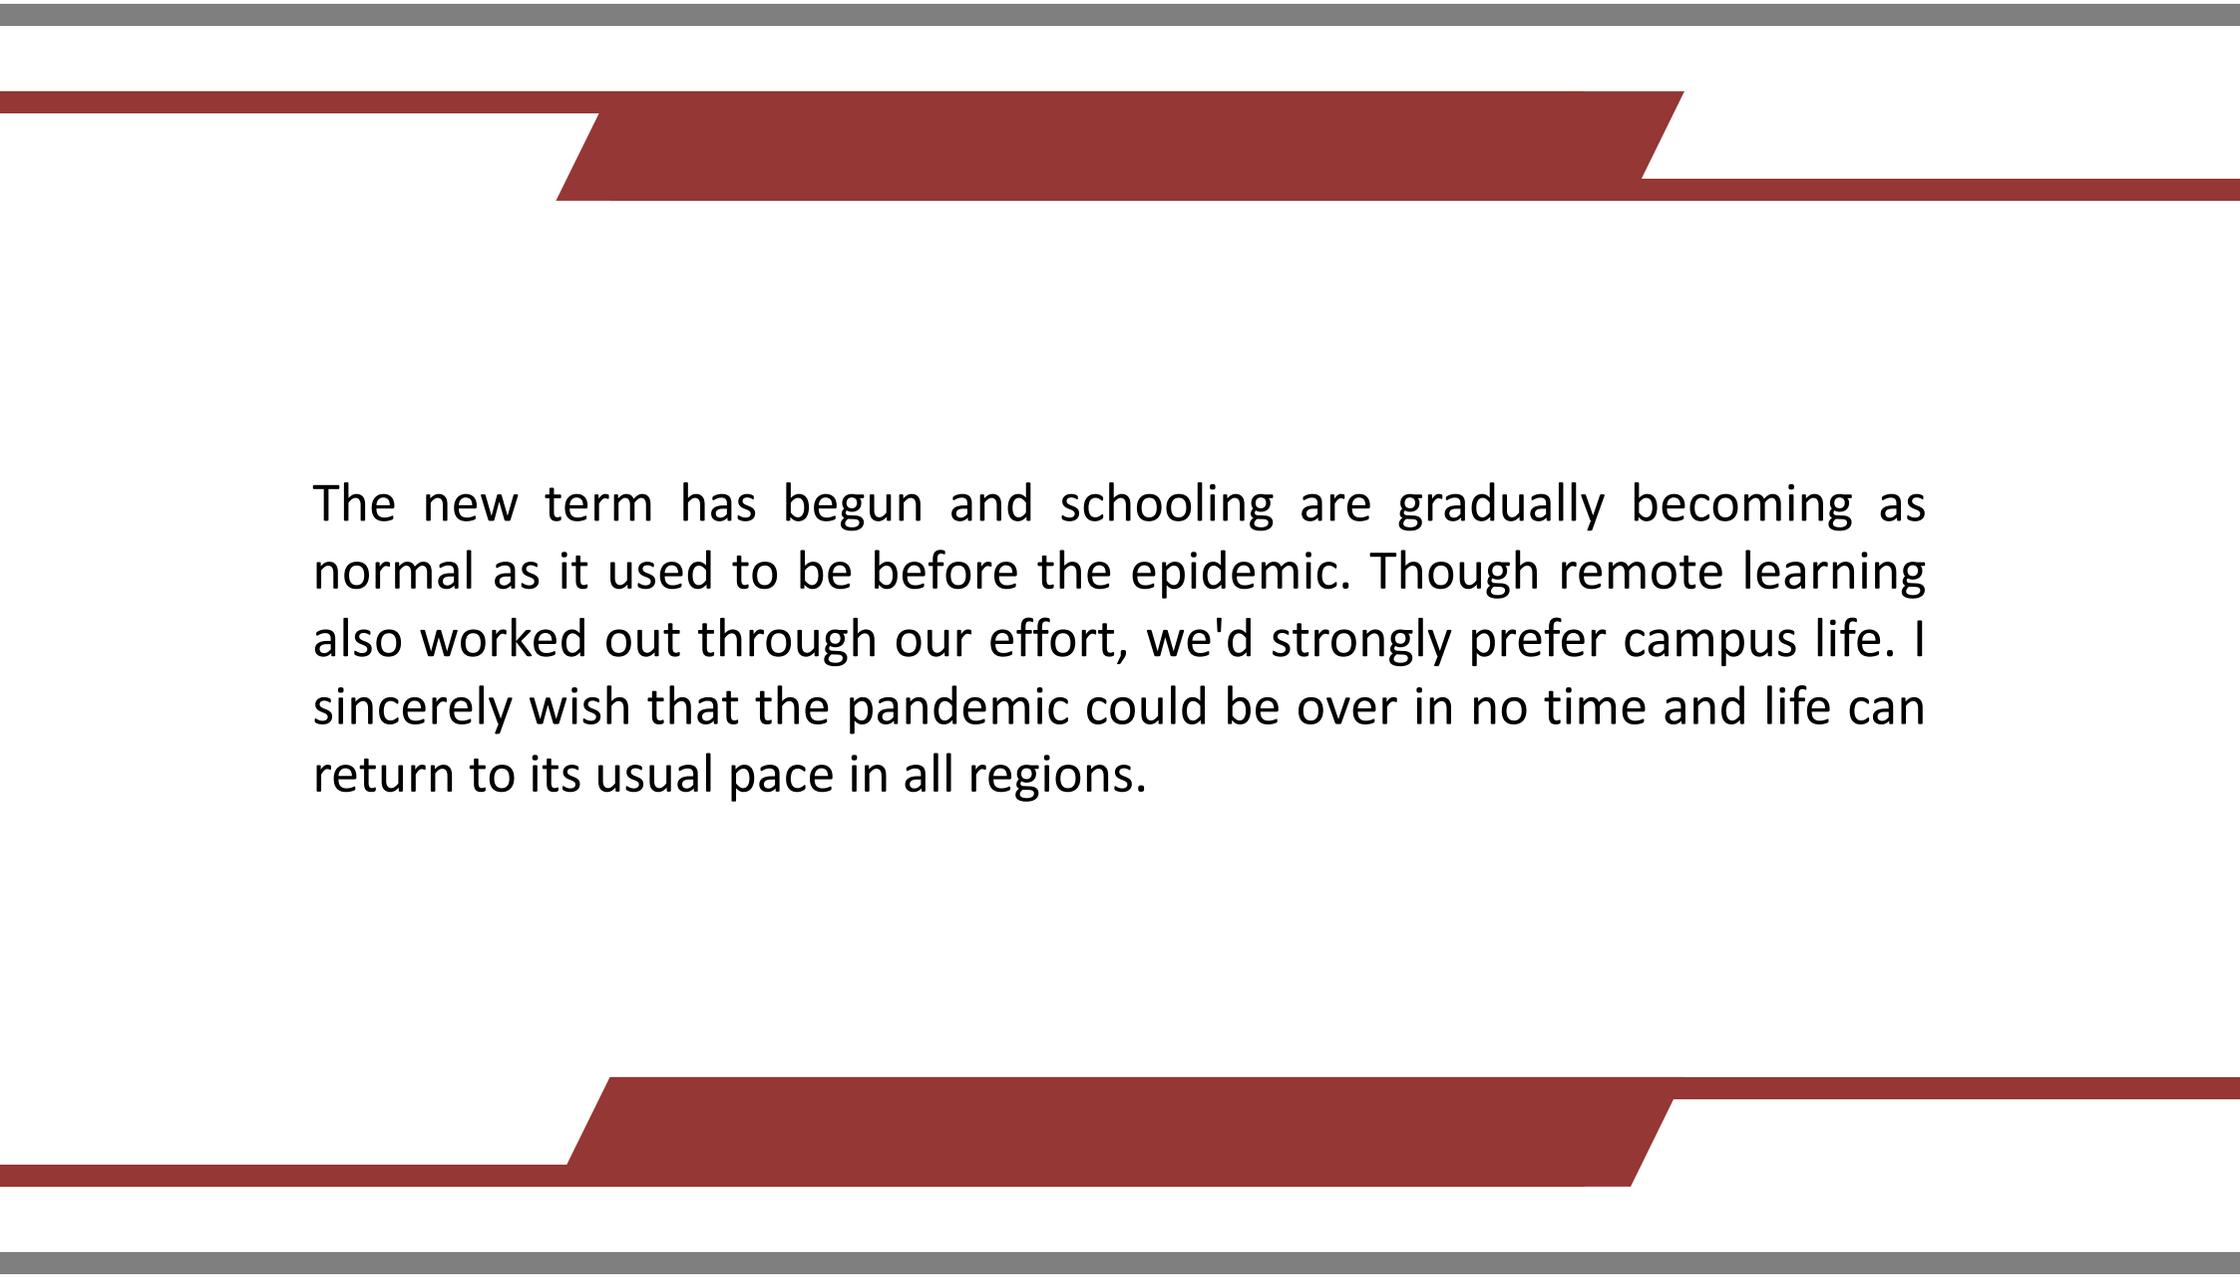

A bolt out from the blue-
mid of our last mock exam

Felt hopeless and
wondered if the pandemic
would be endless

pecially additional Q&A
meetings and an extra
adaptive activity

The final days

The new term has begun and schooling are gradually becoming as normal as it used to be before the epidemic. Though remote learning also worked out through our effort, we'd strongly prefer campus life. I sincerely wish that the pandemic could be over in no time and life can return to its usual pace in all regions.

THANK YOU!
