

# VOResource Extensions (SimpleDALRegExt)

Ray Plante

# Standards Dependencies

Recommendation	Note
Proposed Rec	In Development
Working Draft	
Working Draft (xml only)	

This depends on that

# General status of extension work

- ApplicationRegExt
  - Deferred (again) for insufficient motivation
- TAPRegExt
  - Successful completion of an extension by another WG
  - VOEvent is poised to do the same in the context of its access services
  - With SimDB, Theory WG is also so poised
- SimpleDALRegExt
  - The last planned extension by the RWG

MISSION ACCOMPLISHED ;-)  
(Let's shift our focus back to discovery)

# StandardsRegExt

- Now a rec
- Action on Ray:
  - Create records for all IVOA standards in RofR
  - Help welcome

# SimpleDALRegExt

## Appendix C: Change History

- Now recommend `ssap` as prefix; changed all occurrences of `ssa` in text and schema.
- added `<supportedFrame>` to `ssap:SimpleSpectralAccess`
- removed import of `VODataService` schema from `SIA`, `SSA`, and `Conesearch` schemas.
- change base type of controlled vocab types from `xs:string` to `xs:token` for consistency with `VOResource`.

# SimpleDALRegExt

## Appendix C: Change History

- Now recommend `ssap` as prefix; changed all occurrences of `ssa` in text and schema.
- added `<supportedFrame>` to `ssap:SimpleSpectralAccess`
- removed import of `VODataService` schema from `SIA`, `SSA`, and `Conesearch` schemas.
- change base type of controlled vocab types from `xs:string` to `xs:token` for consistency with `VOResource`.

Simple controlled values taken from STC
