DM WG

L. Michel J. Salgado

Session #4: DM Status report (Tuesday May 5, 6:00-7:00 UTC)

- The chairs will present and discuss their visions on the DM usage.
If you you have to complain (or to applaud) about VO DMs, this the place to be.
- Introduction by: Laurent Michel

Session #8: Meas, Coords, Transform Model Status report (Tuesday May 5, 22:00-23:00 UTC)

- Focus:
 - We will present the current status of the MCT (formerly [[STC]]) post-RFC model revisions.
This the place to be to get more about the last step for these models and the implementations already done.
 - There should be plenty of time to brainstorm additional projects moving forward to exercise the models in various 'toy' applications... so PLEASE BRING IDEAS!
- Introduction by: Mark Cresitello-Dittmar

Session #18: Implementations of the Provenance Datamodel (Thursday May 7, 15:00-16:00 UTC)

- Provenance is now a REC. Therefore this session is more a cross WG topic one than a DM one.
Provenance authors will report on their implementations of this model.
- Introduction by: Provenance group

Session #22: Source model progress report (Friday May 8, 6:00-7:00 UTC)

- Focus:
 - The work of the source model resumed in Paris last year.
The status of this component based model as well a possible workflow to annotate archival data will be presented there
- Introduction by: Laurent Michel
