Grid and Web Services Working Group

Wednesday 19 October session - 16h15 / 17h45

VOSpace & Scientific Workflows

VOSpace 2.0

- Introduction

- Changes since Naples

- Last feedbacks from the last

    - CADC implementation

    - VAO implementation

- Discussion

    - RFC ready ?

    - if not ...

Introduction

- Transition period with the change of both the chair/vice-chair of the working group

- ...

Changes since Naples

- Matthew has updated the WD in June with the following update after Naples

- (1) No spaces allowed in URIs (VOSpace identifiers)

- (2) Creating a new resource returns HTTP 200 (not 201)

- (3) /transferDetails is a standard endpoint for synchronous HTTP PUT

- (4) .auto (server-side node naming) is optional

- (5) Other view values are possible in addition to view=data, e.g., ?view=RSS (this is optional)

- See also LastPoints document

Presentations

- Pat

- Dmitry

Scientific Workflows

- IVOA Note «Scientific Workflows in the VO»

  - introduction

  - presentation, Jose Enrique

- BoF at next ADASS (Wednesday evening)

- Discussion
