Time Domain Interest Group Summary of the meeting

Several TDIG related presentations in Apps, DAL and DM WGs

Presentations and discussions covered the following topics:

- Visualisation and representation of time series data (DM)
  - Ongoing efforts on model
  - Different serialisations
  - ➡ Work closer to data and clients.
- Searching tabular data via cone search and extending to time domain (DAL)
  - ➡ Extension of SCS to add a TIME_INTERVAL
  - ➡ Towards a SpaceTimeSearch Protocol to find data by space-time coverage
  - ➡ Feedback on datalink
- Connecting data in space and time to find where and when using ST-MOC (Apps)
  - MOCpy library with STMOC
  - >160 already existing, and more to come
  - Example use case: find simultaneous observations of different missions
