

RofR Report

12 Oct 2019

(Sat @15:30)

Janet Evans (*CXC Software Development Manager*)
for
Panagoula Zografou (CXC Archive Team Lead)

-
- New RofR release week of Sep 23, patched on Oct 3 for two new XSDs that affected GAVO registry validations :
 - Links on the RofR web page
 - Replaced "Guide for Registry Provider" with "Getting into VO Registry; used <https://wiki.ivoa.net/twiki/bin/view/IVOA/GettingIntotheRegistry> as the target
 - Removed "Registry Specifications"
 - Now display the correct list of searchable registries on the RofR web page
 - Internal bug fixes and improvements including following redirects when trying to access a registry to validate it
 - Change for OAI validation to not use S. Africa repository for XSDs which had suddenly gone out of service.
-

- Added option for validator to use schemas provided in the registry document
 - Updated XSDs that RofR is using for validation
 - VODataService-v1.1.xsd
 - VOSITables-v1.1.xsd
 - ConeSearch-v1.1.xsd
 - VOResource-v1.1.xsd
 - TAPRegExt-v1.0.xsd
 - SIA-v1.2.xsd
 - VORegistry-v1.1 xsd
 - Removed requirement for phase 1 OAI validator to find schema locations in the document
-

- Registries re-harvesting - last re-harvesting on Sep 23
 - Two registries not responding, sent mail to owners
 - arvo-registry.sci.am
 - vespa.labs.vu.nl
 - Registries validation
 - Validated all registries on Sep 26; 18 of 43 failed, sent reports to owners
 - System infrastructure upgrade
 - Need to upgrade RofR server OS, Tomcat and Apache versions, Java version
 - Will schedule work after the Interop.
-
