Although VOSpace 1.15 should probably be VOSpace 2.0 as it is not compatible with the previous REC VOSpace 1.0, we agreed to leave this version to VOSpace 1.15 as it would be too difficult to change the existing implementations. This incompatibility is stated in page 1 so this is clear.

Ref. Implementation 1 Caltech : <http://nvo.caltech.edu:8080/vospace-1.1>

Ref. Implementation 2 Interoperability between the various VOSpace implementation at Caltech, JHU and Astrogrid has been done

Recommendations to EXEC	VOSpace 1.15 has gone through a long RFC and TCG review process with approval from all WG and IG chairs. Several implementations have been made and interoperability between them has been tested. The TCG recommends the IVOA EXEC to approve VOSpace 1.15 as an IVOA Recommendation.
