Data Access Layer

- opening plenary – Heidelberg 2013
  - Patrick Dowler (chair)
  - Mike Fitzpatrick (vice chair)

DALI-1.0

- RFC period for PR-DALI-1.0 ended March 22
    - comments resulted in small edits to the document, mainly clarification
    - only change in substance is to restrict how parameters can be added to an existing UWS job (DALI-async)
- new revision to repository next week
- TCG review to begin next week

Filter Profile Service

- SVO Note proposes FPS

    - use cases

    - proposed service interface

    - implementation

- prior art exists, but never standardised

    - NVO Filter Profile Service
        http://voservices.net/filter/

- Is there enough interest now?

    - splinter session?

DataLink

- several prototypes since last Interop
  - CDS
  - CADC (extended funtionality since last shown)
  -

- session: Monday PM
  - discuss prototypes
  - agree on details
  - develop roadmap to DataLink-1.0: WD->REC

CSP Focus Sessions

- focus sessions to hear about use cases

    - N-dimensional data (cubes)

    - Time Domain

- panel discussion to drill down and really understand issues

- DAL sessions: technical discussions!!

    - use cases → requirements → capabilities

    - develop roadmaps to deliver the capabilities

- Tuesday PM (cubes) – Wednesday AM (time)
