Outcome of the two sessions

Andreas Wicenec, André Schaaff

Grid and Web Services Working Group
17 May 2013

IVOA Heidelberg, 12-17 May 2013

Session 1

- Workflow use / use cases
  - Science use case, Andreas Wicenec
  - Octopus, new synchronous research-driven SAMP-based workflows, Ivan Zolotukhin
    - A "broker" between TOPCAT and other VO tools through SAMPy
    - Request for help to continue
- A presentation of 2 projects "deeply" workflow oriented
  - Wf4Ever, Jose Enrique Ruiz
    - Preservation, AstroTaverna (VO Standards inside), …
  - ER-flow, Gabor Terstyansky (Coordinator of the project)
    - Develop, share and execute workflows with the SHIWA simulation plateform
- We had a short discussion but we need to follow it via the mailing list
  - Relation between workflows and VO standards ?
  - What is really in the scope of VO WGs ? in which WGs ?

Session 2

- UWS evolutions, Pierre Le Sidaner

  - We need a complete session to have a discussion about the future of UWS

- Clouds in the frame of Citizens Science, Andreas Wicenec

  - theSkyNet PS1 Optical Galaxy Survey / Amazon cloud

  - Cheap and cheerful way to build TFlop / Pflop machine

- Discussion about abusive users, Mark Holliman

  - Best practice document will be provided

- VOBox, Ray Plant

  - A DropBox-like based over VOSpace

  - A few people are interested and ready to test it

- PDL, Parameter Description Language, Carlo Maria Zwölf

  - Last remarks to integrate and typo checking before converting it to a PR and pushing it into the RFC process

- Authentication, started this week via mail and feedback at the next interop
