

Proposed todo list for new IVOA web pages 2011-03-13  
Based on "proposed changes" page of May 27th 2010 at  
[http://www.ivoa.net/internal/IVOA/RevisedWebsiteDesign/proposed\\_changes052710.html](http://www.ivoa.net/internal/IVOA/RevisedWebsiteDesign/proposed_changes052710.html)

but slightly hardened up and with with some further additions and comments

### **Global / menu bar :**

- \* Add "Home" link as per Evanthia suggestions
- \* Change top bar order to match lower : Astro/Dep/Members/About
- \* contact link : make copyright IVOA into a mailto link to [ivoadoc@ivoa.net](mailto:ivoadoc@ivoa.net).

### **HOME Page :**

- \* Remove calendar/news
  - \* make links in lower horizontal bar agree with the relevant pages.
- Have adjusted based on other actions further down :

#### **Astronomers :**

Getting Started; Using the VO; VO tools and portals; IVOA newsletter; Glossary

#### **Deployers :**

VO concepts; Current Standards; Software for Deployers; Data Publishing; Application Writing; Technical Acronyms

#### **Members :**

IVOA Calendar; Working Groups; Twiki; Documents in Progress; Events; Forum

### **ABOUT section :**

- \* about/what-is-ivoa :  
under "Additional Information" remove links except first and third  
under "Technical Milestones" link only latest (Oct 2010)
- \* about/roadmap :  
link only the Oct 2010 roadmap.
- \* about/wg-contacts :  
add column with descriptive name of mailing list  
Link should go to the archives with a link at the top on how to subscribe.
- \* about/member-organisations :  
VO UK should be AstroGrid, United Kingdom  
Add ESA and ESO  
update chair , vice chair etc as necessary

### **MEMBERS section :**

I put together a mock up of something corresponding to Keith's suggestions (members-page.pdf)  
Anything giving the same idea will be fine : an easy set of links for members. The links in eth pdf file are live so you can test the idea.

- \* Note Exec is just another WG in the table. Ditto TCG.

- \* update the WG list  
merge VOQL and DAL  
add Liaison Committee

add Science Priorities Committee

### **DEPLOYERS section :**

Christophe to take overall responsibility

\* Revised TOC (with authors) :

Introduction to VO Concepts (Andy)

Current list of Standards (Christophe)

*(current list only : list and graphical version)*

Software for Deployers (Christophe)

*(based on Euro-VO page)*

Data Publishing: Worked Example (Christophe)

Application Writing: Worked Example (Christophe)

Technical Acronyms in Use (Sarah)

*(start with NVO book glossary)*

### **ASTRONOMERS section**

\* Andy to draft Getting started and Using the VO

\* "VO portals worldwide" should be "VO tools and portals worldwide"

\* Sarah to make initial draft, based on Euro-VO page (= new VAO stuff ???)

\* Make link to newsletter live

\* Add link to "The VO for students and the public"  
(I prefer this to "students and amateurs")

\* Fabio to draft section on "The VO for students and the public"

\* Add final link to "VO Glossary for Astronomers"  
*(Andy to draft and see if this works !)*

### **DROPPED/IGNORED/COMMENTED**

\* I think news/calendar is indeed only for members.

- Hard to keep up, and mustn't duplicate what projects do.

\* Stick with "Members"

\* Links to VO papers : agree this is too ambitious : ignore
